PERSONAL EXPERIENCE GOAL ACHIEVE

Front-End Developer with hands-on experience building responsive and user-friendly websites using HTML, CSS, JavaScript, Bootstrap, Shopify, Liquid, and WordPress. Experienced in website development, UI implementation, debugging, and Git/GitHub. Familiar with Java, React, and Spring Boot. Hands-on experience with Vibe Coding, AI coding tools, Local LLMs, LLM APIs, and AI-assisted development for software development and automation. Interested in Full-Stack Development and AI-powered applications.

EXPERIENCE

Naturelink Organics Pvt Ltd

Full - Time
01 Feb 2026 - 30 Sep 2026)

Web Developer | 8 Months

- Developed and customized Shopify and WordPress websites.
- Created responsive and mobile-friendly web pages using HTML, CSS, JavaScript, Bootstrap, and Liquid.
- Customized WordPress themes and plugins.
- Fixed website issues and performed basic testing and debugging.
- Used Git/GitHub for code management.
- Worked with team members to complete website requirements.

Skills: Shopify, Liquid, WordPress, PHP, HTML, CSS, JavaScript, Bootstrap, Git, GitHub, Responsive Web Design, UI Development, Debugging.

MNJ Software

Full - Time
05 Nov 2024 - 07 Jan 2026

Having 1.2 **Year** Experience as **Frontend Developer on Dot.Net FrameWork**
Full-time

- Collaborated closely with UX/UI designers and development teams to build responsive, user-friendly, and visually appealing web applications.
- Developed and maintained scalable, reusable, and optimized front-end components using HTML, CSS, Bootstrap, JavaScript, and jQuery, helping reduce development time by 20%.
- Worked on modern front-end development practices, including component-based architecture, responsive layouts, cross-browser compatibility, and performance optimization.
- Utilized advanced CSS techniques and responsive web design principles to deliver seamless user experiences across multiple devices and browsers.
- Worked with senior developers on projects using .NET Core MVC and Spring Boot frameworks as per business and project requirements.
- Managed source code and version control using Git & GitHub for collaborative development, branch management, and code reviews.
- Participated in project management and task tracking using Jira Software to manage development workflows, bug tracking, and sprint activities.
- Assisted in deployment workflows and gained exposure to CI/CD pipelines, automated build processes, and deployment practices for efficient software delivery.
- Collaborated within Agile development environments, contributing to feature development, debugging, testing, and application maintenance.

Skills: Front-End Design · Responsive Web Design · Web Development · Web 2.0 · Debugging · UI development · C# · ASP.NET Core MVC · Spring-boot , Git / GitHub , CI / CD , Jira

.

EDUCATION

Shivaji University

Maharashtra
2021 - 2024

Bachelor of Computer Applications || CGPA : 7.7

TRAINING / COURSES

Seed Info-Tech ,Pune Maharashtra

2024 - 2025

JAVA Full-Stack with AI JAVA Full-Stack with AI Training focused on backend technologies and AI integration

TECHNICAL SKILLS

Language : Java, JavaScript, SQL, HTML, CSSL, CSS
Frontend: React.js, Bootstrap, Responsive Web Design
Backend: Spring Boot, Spring MVC, Spring Data JPA, REST API
Database: MySQL
Security: Spring Security, JWT
Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code
AI & Automation: AI-Assisted Development, Vibe Coding, Ollama, Local LLMs, LLM APIs

PROJECT

Namustutam SaaS POS & Inventory Platform | Full-Stack Developer

12 - Fab 2026 - Present

This project comprehensive, multi-tenant web application designed to streamline retail and inventory operations. Built with a modern tech stack—React.js, Spring Boot, and PostgreSQL—the platform bridges the gap between online sales and offline in-store transactions. It features a robust Role-Based Access Control (RBAC) system, real-time analytics dashboards, and complex data management for products, stock transfers, and automated inventory alerts.

Objective: To provide businesses with an all-in-one, scalable SaaS solution for managing point-of-sale transactions, multi-location inventory, and staff access privileges securely

Core Features:

- Seamless online and offline POS order processing.
- Multi-tier RBAC authentication (JWT & OAuth2) for Super Admins, Admins, and Clients.
- Real-time KPI dashboards visualizing sales metrics and stock levels.
- Automated alerts for low stock and expired products.
- Complete lifecycle management for products, categories, purchases, and returns.

Technical Highlights: Engineered a high-performance RESTful API backend in Java/Spring Boot that communicates with a responsive, component-driven React frontend. Designed a normalized PostgreSQL schema (15+ tables) to ensure data integrity across complex transactional workflows and multi-tenant structures.
